Like I have to call ValidateAntiForgeryToken and AntiForgeryToken attribute in my controller method. How to achieve this with unity container. I am not using any specific framework.

A: You don't, that's what services are for! Each request requires a DTO and such a DTO is best passed to the HttpContext.RequestServices if you have it or what's more commonly HttpContext.Items if not. With this, you can easily get the AntiForgeryToken value. GetDto(HttpContext.Items["AccessToken"]); And then use it in any service method you like. Developer's Concept

----- "I want this game to create a sense of awe by obscuring the rules, and be filled with action with a powerful image that induces excitement in the player."

THE NEW FANTASY ACTION RPG.

Rise, Tarnished, and be guided by grace to brandish the power of the Elden Ring and become an Elden Lord in the Lands Between.

- A Vast World Full of Excitement

A vast world where open fields with a variety of situations and huge dungeons with complex and three-dimensional designs are seamlessly connected. As you explore, the joy of discovering unknown and overwhelming threats await you, leading to a high sense of accomplishment.

- Create your Own Character

In addition to customizing the appearance of your character, you can freely combine the weapons, armor, and magic that you equip. You can develop your character according to your play style, such as increasing your muscle strength to become a strong warrior, or mastering magic.

- An Epic Drama Born from a Myth

A multilayered story told in fragments. An epic drama in which the various thoughts of the characters intersect in the Lands Between.

- Unique Online Play that Loosely Connects You to Others

In addition to multiplayer, where you can directly connect with other players and travel together, the game supports a unique asynchronous online element that allows you to feel the presence of others.

Elden Ring Key features:

- Nosferatu
- Adventuring
- Characters and Customization
